DETAILED ACTION

1. Amendment B filed on 2/21/03 has been fully considered and made of record in Paper No. 7.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 2/21/03 in Paper No. 8 was filed after the mailing date of the non-final rejection on 11/9/02. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Response to Arguments

3. Applicant's arguments filed 2/21/03 in Paper No. 7 have been fully considered but they are not persuasive.

Applicant alleges that the test for 35 U.S. C. 101 has not been met since U.S. Patent No. 6,306,687 fails to disclose **a lead fingers in strip form having a pair of side rails connecting each lead frame to another lead frame in the strip**. This is deemed to be unpersuasive because it is inherent that lead fingers are in strip form having a pair of rails connecting each lead frame to another lead frame in the strip. Therefore, the previous statutory double patenting rejection is maintained and this action is made **final**.

Double Patenting

4. The phrase "**a lead fingers in strip form having a pair of side rails connecting each lead frame to another lead frame in the strip**" that was added to claims 1 and 15 of the instant application is inherent in the claims in U.S. Patent No. 6,306,687. Therefore, this rejection is based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 1-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 10 of prior U.S. Patent No. 6,306,687. This is a double patenting rejection.

The prior art made of record and not relied upon is cited primarily to show the process of the instant invention.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is

filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
